Ready Engineer Report

DEPARTMENT OF MECHANICAL ENGINEERING

2018-19 & 2019-20

Introduction

Tata Technologies, a leading global provider of engineering services and manufacturing enterprise IT, today signed a Memorandum of Understanding (MoU) with eight colleges in Aurangabad to offer its flagship 'Ready Engineer' Program for students. The initiative aims to bridge the industry-academia gap and make engineering students workforce-ready by providing them with real-world, hands-on exposure to technology.

According to the United Nations Development Programme's (UNDP) India Skills Report 2018, 1.5 million engineers graduate every year, but only 52% are employable. The report also highlights the fact that engineering courses which are linked with industry or corporate through internship or training usually score high on employability as compared to others.

To address the skill gap, Tata Technologies' 'Ready Engineer' program identifies mechanical engineering students from colleges to be part of this unique training. The program imparts application-based training by industry experts, in the Design Engineering domain and Computer-aided Design (CAD) tools, hosted on Tata Technologies' learning tool i GET IT®.

Tata Technologies expands its flagship Ready Engineer program to eight colleges in Aurangabad.

Objective

1. To bridge the engineering industry talent gap by educating and mentoring aspiring young engineers.
2. To be a catalyst in reducing the academia-industry gap and ensure that the future engineers are ready for the industry.
