Annexure – IV

Practice-I

Title of the Practice: Mentor Mentee Scheme

Goal

- One to one counseling of students through faculty-student interaction at individual level.
- To enable the students for academic excellence.
- To develop leadership qualities among students.
- To learn how to communicate effectively in networking situations.
- To enable the students to identify their strength and weakness.
- To develop decision-making skills.
- To Provide guidance and support by creating an environment of openness where meaningful communication and trust can exist.
- To assist mentee in identifying objectives/goals.

- To assign mentee specific tasks/assignments aimed to develop their skills.
- To motivate the mentees to become entrepreneur.
- To inculcate the values of good citizenship among students.

The Context

The mission of the institute is to provide educational platform for students of rural and urban background. Naturally there exists diversity among admitted students in terms of academic, financial and cultural background. To prepare these bunches of diverse students it is important to bring them on a common platform, wherein they can share their views and ideas and problems if any. In order to achieve excellence, it is important to groom the students for curricular, co-curricular and extracurricular activities.

In this context, mentor mentee mechanism is a platform where each faculty member is assigned a group of students as mentor and it is the responsibility of the mentor to provide all support to the students satisfying his academic and other needs. This mentoring program would add the quality of self-reliant and judicious use of leisure time apart from daily academic routine. Students are enabled to learn the real practical facts of industrial life under the roof of educational institute.

Practice

In this mechanism,

- Mentors conduct regular meetings with respective mentees to understand their problems and guide them accordingly.
- The Director of the institute personally counsels each mentor group about engineering education, skills to be acquired, best practices to be an engineer and job opportunities.
- Each mentor motivates students for undergoing minimum two mini projects, four presentations on technical/non-technical topics and mentor arranges two industrial visits for the assigned group of students.
- The mentor motivates the mentees for participation in various co-curricular and extra-curricular activities.
- In annual social gathering mentor has freedom to nominate a student or group of students for different events depending upon skills of the mentees.

- Many of the messages / notices are conveyed to the students through this mechanism.

Practice-II

Title of the Practice: Skill Enhancement Programs

Goal

- To build and develop inner excellence, communication skills, aptitude and corporate etiquettes among students.
- To prepare students from placement perspective.

The Context

To increase the employability of the students is one of the objectives of the institute. The majority students admitted in the institute belongs to rural background. They have a natural fear about the official communication language of the industry i.e. English. Also in majority of the campus placement's aptitude test is an important factor. Most of the companies scrutinize the students based on their aptitude skills. The students are lacking in both soft skills and aptitude and thereby require training. The students also require training on domain expertise of respective branch and need to be trained as per the requirement of the industry. In order to overcome this challenge, the institute has signed a MOU with professional organization TechRel technologies, Pune for training the students on soft skills and aptitude. The institute is instrumental in arranging domain specific training programs for the skill enhancement of students.

The Practice

- In order to mold the students as per the need of the industry, the institute offers training on soft skill, aptitude and domain specific value addition trainings.
- In the curriculum of university, a subject communication skill is offered for second and third year students, wherein syllabus completion duration is only 20 Hours. In order to inculcate in depth knowledge of the subject, the institute has increased the duration of the subject to 40 hours by necessary changes in the time table and syllabus at institute level.
- Additionally, the institute has divided the strength of the class into half for increasing the effectiveness of the subject delivery.

- The institute is conducting online mock tests of the subject for the practice of the students.
